1. Load DVDs

[Download Xilisoft DVD Ripper Platinum](#) and install to your computer. install it and run, load your DVD movie from targeted drive. Now learn more about the interface of Xilisoft DVD Ripper Platinum:

2. Rip entire DVD to one file

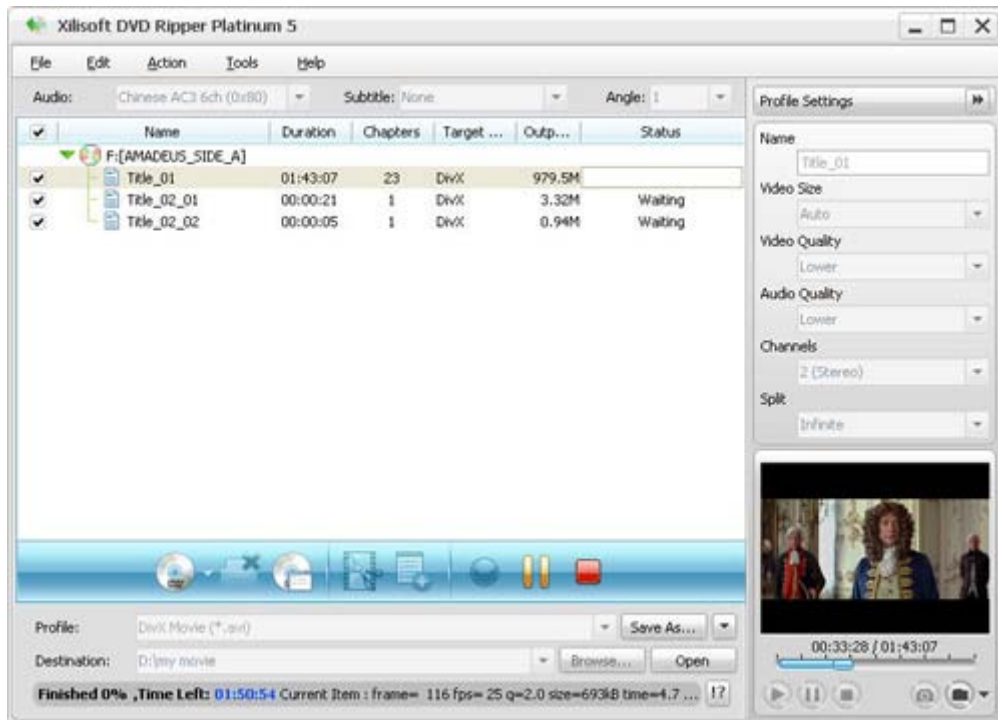

All files from DVD disc are uploaded as the following picture:

You can rip DVD with three main modes. One is title mode (ripping the whole DVD to one file), one is segment mode (ripping video clips), the other is chapter mode. If you rip in chapter mode, you will get a file for every chapter. When the list box displays the titles not chapters you can convert the whole DVD into one file. If you'd like to extract video clips, just set 'Start Time' and 'Duration' to rip the segment.

3. Start ripping DVD

ALL settings have been completed, clicking on the red button to start ripping.

Wait for a while, getting the file you want is an easy thing with Xilisoft DVD Ripper Platinum.
