Tips for using this FLV to PSP converter

Reset parameters: Click "Advanced Profile Settings" button to set various parameters for satisfying your needs.

Add another profile: Select a video and click the "Add Profile" button to choose another profile as your output format. In this way, you can get several video files with different profiles.

Step 4: Start to convert.

Click "Convert" button to convert FLV to PSP.

Ok, done. After the conversion is completed, you can put the converted FLV videos on your PSP.

How to put converted FLV videos on PSP?

PSP System is using Memory Stick Duo to store games, music, videos and other content.

Step 1: Check your Memory Stick Duo: Be sure there is enough space for saving your video files. If this is the first time you've used it, you have to format your Memory Stick Duo to create the proper folder structure.

Step 2: Connect Memory Stick Duo to your computer.

Step 3: Open the Memory Stick Duo on your computer and copy video files to the VIDEO folder.

Note: If you're using a old version, you should put videos in the MP_ROOT/100MNV01 folder. And a normal PSP video should consist of a .MP4 and a .THM file.
